

## **Epygi Technologies, Ltd. and babyTEL Inc. Announce Interoperability**

**Epygi Technologies, Ltd. and VoIP pioneer babyTEL Inc. recently completed interoperability testing and certified that the Epygi's line of Quadro IP PBXs will work seamlessly with babyTEL's carrier-grade VoIP service.**

**MONTREAL, QUEBEC, CANADA, and PLANO, TEXAS, USA (May 12, 2009)** – Epygi Technologies, Ltd. and babyTEL Inc. are pleased to announce that babyTEL SIP Trunking and associated VoIP features will now be supported with Epygi's SIP-enabled business phone systems.

Epygi's SIP trunking capabilities allow the Quadro family of business communication systems to communicate natively over IP with a SIP service provider. babyTEL offers VoIP service packages at different pricing models to suite the needs of different business customers. These services were developed for today's businesses with requirements spanning traditional telephony, virtual presences, multiple locations, satellite offices, mobile work force, and tele-workers.

"Epygi strives to provide our resellers the highest quality and most complete product offering. By partnering with babyTEL, we are able to offer a complete and reliable VoIP solution not only to our resellers but our large base of SMB customers," said Mario Cuello, CEO of Epygi. "We are pleased to announce this interoperability, which will allow customers to benefit from the flexibility and scalability that will help to increase their productivity while driving down communication costs."

"This announcement represents babyTEL's continued commitment to enterprise VoIP," said Stephen Dorsey, President and CEO of babyTEL. "We are very pleased to have the opportunity to work with a world-class organization like Epygi. Our combined solution is loaded with valuable features and benefits and we look forward to supporting Epygi dealers in offering a total telephone solution to the business community."

### **About Epygi**

Reliable, secure, and easy to install and use, the Quadro range of IP PBXs, VoIP gateways and cost-saving conference servers offer users outstanding benefits and an unparalleled range of features at very economic prices. The state-of-the-art equipment gives superior sound quality and a quick return on investment because of its low maintenance cost.

Epygi Technologies, Ltd. a private US company, was founded in 2000 and has its headquarters in Texas. It designs and manufactures its market-leading products using its own IP PBX call manager software based on standard SIP technology. Through its network of respected dealers in over 40 countries, Epygi provides converged telecom solutions to organizations around the world.

### **About babyTEL**

babyTEL's core business is enterprise and home VoIP and is now pioneering VoIP and Social Networks with its Telephone application on Facebook. babyTEL is an established company with a 15-year track record of developing innovative and successful new telecom products and services, including the first platforms for the deployment of fax over IP in large-scale networks and networked unified messaging. Customers include major carriers and Fortune 100 companies. For more information, please visit [www.babytel.net](http://www.babytel.net).
